

Luxury Meets Science for Radiant, Glamorous Skin.
Experience Science, Innovation, and professional expertise
with Streax Professional Skin.

UV Rays:

Exposure to UV rays triggers excess melanin production, causing tanning, dark spots, and uneven skin tone.

Pollution:

Airborne pollutants damage the skin barrier and increase free radicals, leading to moisture loss, uneven skin tone, and dullness.

Excessive Makeup:

Frequent and heavy makeup application clogs pores, disrupts the skin barrier, and results in buildup, dullness, and pigmentation over time.

Stress:

Elevated cortisol levels due to stress interfere with skin repair, reducing brightness and leading to dull, tired-looking skin.

THESE ISSUES CULMINATE IN VISIBLE SKIN CONCERNS:

Hyper Pigmentation

Wrinkles

Loss of Skin Elasticity

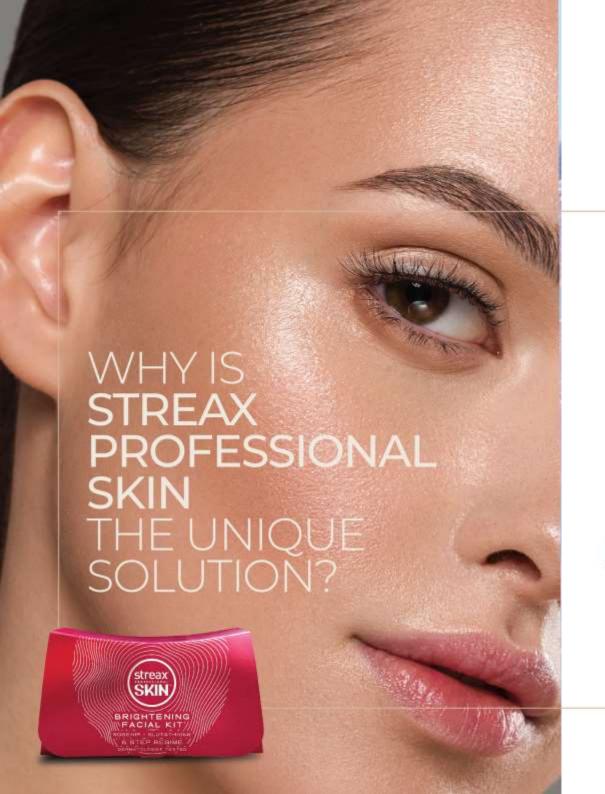

Tanning

CLINICALLY TESTED TO DELIVER SKINCARE SOLUTIONS

Now, pamper your way to brighter-looking skin! Streax Professional Skin's brightening facial kit helps even out skin tone to unravel Beautiful, radiant-looking skin. Enriched with ingredients known to reduce dark spots and smoothen Skin texture, thus revealing a complexion that appears clearer and brighter.
